

Expert Manufacturing for Every Clinical Trial Phase

Optimize your pharmaceutical
development and manufacturing

- ✚ (Aseptic) Fill and finish of solutions
- ✚ (Aseptic) Fill and finish of powders, gels, creams and ointments
- ✚ Blinding of clinical trial medication
- ✚ Preparation of (placebo) capsules
- ✚ Randomisation, packaging and labelling of clinical trial medication
- ✚ Handling of narcotic drugs
- ✚ Filling in vials, tubes, PFS and more

Investigational Medicinal Products

Basic Pharma IMP specializes in the manufacturing of Investigational Medicinal Products (IMPs), which are pharmaceutical formulations used in clinical trials. These products are developed, prepared, and packaged under strict regulatory standards to ensure safety, consistency and compliance throughout the research process.

Fill & Finish

Basic Pharma has extended experience in the manufacturing of IMPs. Our experienced team can advise you in all steps of the production campaign.

Packaging, Labeling & Randomization

We support double-blind clinical trials through secure and compliant randomization processes. Our team ensures that both active and placebo medications are indistinguishable, enabling unbiased study results while maintaining full traceability and regulatory compliance.

Dosage Forms

We offer a wide range of capabilities to support your clinical trial and pharmaceutical manufacturing needs. Below an overview of the dosage forms and specialized services:

- (Aseptic) Fill and finish of solutions
- (Aseptic) Fill and finish of powders, gels, creams or ointments
- Blinding of study medication
- Preparation of (placebo) capsules
- Randomization, packing and labelling of clinical trial medication
- Handling of narcotic drugs
- Filling in vials, tubes, prefilled syringes (PFS) and more

Quality Control

Our experienced Quality Control department specializes in IMP requests, ensuring all your projects are fully GMP-compliant

Batch Upscaling

To keep up with the need for increasing product volumes throughout the development process, we can help you scale up the production process from lab-scale quantities to clinical trial up to commercialization.

As your partner we can tailor all services to your specific needs, while respecting all relevant quality guidelines.

Full service

We have **wide-ranging experience** in drug development, manufacturing, and regulatory affairs. This means we can support your entire process **from product development to commercialization**.

Quality-assured

We are **fully compliant with GMP and ISO 13485:2016 certification** and our Quality Management Systems (QMS) is regularly updated with the latest standards and customer feedback.

Empowered

Our employees apply their expertise to help you find **the optimal path towards success**. They work in a versatile and proactive way, supporting where needed, so you can focus on your other important business goals. Together, we'll identify the **most cost- and time- efficient path towards success**.
